Branched Chain Amino Acids (BCAA)

Branched Chain Amino Acids (BCAA's) play an integral part in the muscle building process and are essential for energy production.

BCAA's are different from amino acids in that they are metabolized in the muscle, not the liver. As a result, weight training dramatically increases BCAA uptake, creating a higher demand for them.

Since **Branched Chain Amino Acids** (Leucine, Valine and Isoleucine) are essential amino acids which cannot be made within the body, they must be supplied through foods and / or supplementation.

If you're working out hard to gain lean muscle tissue, then, the **Branched Chain Amino Acid Formula** may be right for you. This state-of-the-art formula plays a principle role in muscle recovery, muscle growth and energy maintenance.

It accomplishes this by precisely balancing the 3 branched chain aminos, **L-Leucine, L-Isoleucine** and **L-Valine** along with a supporting amino acid complex.

It also contains the highest grade chromium (polynicotinate) and vitamin B-6 to further enhance uptake.

Our **Branched Chain Amino Acid Formula** was especially developed for fitness enthusiasts by top sport nutrition researchers including **Dr. Edward Lieskovan**-Pharm. D. / professor at University of Southern California; **William Register**, 5 times Mr. America Finalist and Director of Services for SporTelesis, Inc., and **John E. Logsdon**, nutrition expert and developer of several highly-regarded nutrition programs.

Its precise formulation is based on studies conducted by the National Academy of Science. Each BCAA tablet contains 600 mg of isolated free form and peptide bonded Branched Chain Amino Acids.

What You Should Know About Leucine, Isoleucine & Valine

Leucine, isoleucine, and valine are the branched chain amino acids that comprise 70 percent of the available free nitrogen necessary for the synthesis of lean muscle tissue. It is critical that these three essential amino acids are accessible to the body during and after strenuous physical activity in order to reduce endogenous protein degradation.

Leucine

The undisputed preeminent amino acid, leucine not only builds muscle tissue, but also promotes the healing of wounded bone tissue

Supplement Facts

Serving Size 10 Tablets
Servings per Container 9

Amount Per Serving	% D.V.*
Calories	65
Calories from Fat	5
Total Fat	1 g 2 %
Total Carbohydrates	0.5 g < 1 %
Sodium	30 mg 1 %
Potassium	90 mg 3 %
Protein	13.5 g 28 %
Vitamin B6 (as pyridoxine HCl)	50 mg 2,500 %
Calcium	50 mg 5 %
Phosphorus	50 mg 5 %
Chromium (as chromium polynicotinate)	100 mcg 83 %
Amino Acid Complex	13.5 g †
Partially Hydrolyzed Whey Protein Concentrate,	
L-Leucine (BCAA)	3,000 mg †
L-Isoleucine (BCAA)	1,500 mg †
L-Valine (BCAA)	1,500 mg †

*Percent Daily Values are based upon a 2,000 calorie diet.

†Daily Value not established

Other Ingredients: Stearic Acid, Microcrystalline Cellulose, Magnesium Stearate,

TYPICAL AMINO ACID PROFILE***

L-Isoleucine	1,500 mg	L-Proline	526 mg
L-Leucine	3,000 mg	L-Serine	452 mg
L-Valine	1,500 mg	L-Threonine	592 mg
L-Alanine	420 mg	L-Tyrosine	266 mg
L-Arginine	234 mg	L-Glycine	164 mg
L-Lysine	818 mg	L-Methionine	194 mg
L-Histidine	174 mg	L-Aspartic Acid	990 mg
L-Cystine	210 mg	L-Glutamic Acid	1,566 mg
L-Tryptophan****	108 mg	L-Phenylalanine	288 mg

This high potency muscle support formula contains 6,000 mg of isolated free form and peptide bonded Branch Chain Amino Acids (L-Isoleucine, L-Leucine and L-Valine) per serving.
